Demolitions in the Bedouin communities in the Negev 2015 - 2024 (estimated)*

An all-time record of building demolitions in the Bedouin sector in the first half of **2024.**

A record number of 2,007 building demolitions in the Bedouin communities of the Negev/Naqab were recorded in the first six months of 2024, according to the Administrative Division for Land Law Enforcement, headed by Minister Ben-Gvir, the Minister of Internal Security. This, even before the National Unit for Enforcing Construction Laws was transferred to the responsibility of the Ministry. While the Minister calls this "governance", in reality it is a path to ruin.

Assuming that this trend will continue, a significant increase in the number of demolitions that will be recorded in 2024 is expected. Extrpolation of the first six months of the year indicate an expected total of more than 4,000 demolitions in 2024 - an increase of 22% compared to 2023.

House demolition estimated July - December 2024

House demolitions January - June 2024
